DATASHEET

Rockfon Canva® Wall panel

Sounds Beautiful

Rockfon Canva® Wall panel

- Rockfon Canva Wall panel is a versatile solution for improving acoustics in a variety of environments.
- Size and print can be customised to suit the user's mood, room purpose, or brand preference as a single piece element or with customized puzzle combinations and oversize dimensions allowing for entire spaces to be decorated with flawless acoustic design.
- Detachable, washable and replaceable canvas.
- Choose from our 34 inspirational Colours of Wellbeing range or design your own graphic layout. Mix and match with10 different frame colours to create a unique statement for your space.
- Crafted with sustainability in mind, Rockfon Canva Wall panel uses 75% recycled aluminum for the frame and 100% recycled polyester for the textile canvas, ensuring a lower-emission solution without compromising on quality or aesthetics.
- Fast and Easy installation. Panels arrive either fully assembled for single panels and puzzle options or as an easy assembly option for oversize possibillities.
- High performing product with a long performance life.
- Rockfon Canva is a design cooperation with Danish acoustic design company Akuart.

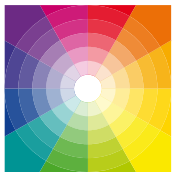
Custom graphic options



Contact your local Rockfon partner to get your choice of image, artwork, graphic design or other visual layout on the canvas surface in high resolution quality print.

All standard colours are printed on the textile with a texture weave pattern.
The Canva surface colours are close textile colour matches to the Rockfon Color-all® products. Colours may vary slightly between different production batches. Reproduction of colours may vary between print and reality. Please note that black frames combined with light coloured canvas can create a shadow effect close to the Canva. Surface textile in 'Mercury' colour does not have a metallic appearance.

Wall panel: The Rockfon Canva textile has a "visual direction". This means that the colours might differ depending on whether the element is hung in vertical or horizontal orientation.
