

GRID NEWS

LATEST DEVELOPMENTS ON CHICAGO METALLIC™ GRIDS / FEBRUARY 2018

THE ULTIMATE NEW MATT WHITE GRID

Our new matt white grid, Matt White 11, is available in a complete range of main runners, cross tees and wall angles, delivering the perfect colour match between your suspension system and matt white acoustic tiles. The unique surface of the Matt White 11 grid simply reduces the visual contrast between your suspension system and white tile. It is now possible to achieve an elegant and almost monolithic look with a standard visible ceiling, at a cost-effective price.

Matt White Grid

A UNIQUE DEVELOPMENT

Matt whiteness

The colour of the suspension grid has always been the Achilles heel of achieving the perfect modular white ceiling. The surface finish of the suspension system can, in the wrong lighting, pick up and reflect colours from the surrounding environment, making it seem more grey than white, interrupting the visual appearance of a visible or semi concealed ceiling.

Enriched design

The new matt white grid has a gloss unit of 2 at both a 60° and 85° angle, and

combined with an L-value of 93, it makes it our whitest grid with a superior matt finish. It is available in both our T15 and T24 grids and an assortment of both our L and W profiles.

Our matt white grid range reduces the shine usually found on standard suspension systems, which can obstruct your white ceiling by picking up colours from the wall.

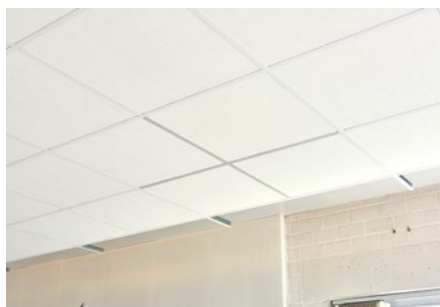

The textured surface of our matt white suspension systems drastically reduces reflections that are traditionally found on

metal surfaces, by diffusing light. The suppression of light propagation at a critical angle keeps light reflection to a minimum. This important design feature means that your white suspension system stays white at all angles, making it the perfect solution for both semi-concealed and visible grid ceiling solutions.

Our new matt white grid eliminates the contrast between the tile and the grid to create an affordable and elegant modular ceiling that stays white.

Matt White 11 Product Range
Chicago Metallic™ T24 Click 2890 Chicago Metallic™ T15 Click 2790
Chicago Metallic™ W-profiles
W8 x 12 / W10 x 15 W shadow moulding wall angle
Chicago Metallic™ L-profiles
L19 x 24 perimeter wall angle trim

Chicago Metallic Matt White 11 Grid has been installed throughout this ceiling except where you can see a "cross" of standard grid between the four tiles.

The Matt White Grid 11 stays white at all angles and does not reflect critical light or appear grey.

Matt White in short

A unobtrusive suspension system which is perfect for visible or semi-concealed solutions.

Available in a complete suspension system range, T15 and T24 grids, as well as our W and L Profiles.

An affordable, elegant solution with a super matt white high-end finish.

A NEW CREATIVE WALL PANEL SOLUTION

MOUNTED ACOUSTICS

Rockfon Eclipse® Wall panels are a universal solution for suspending standard Rockfon Eclipse® Islands vertically, using specially developed fixing kits. The new wall panel solution with its smooth, deep matt, super white surface and clean, minimalistic A edge enhances your design freedom by allowing you to install the acoustic panels at different distances from the wall.

BOUNDLESS DESIGN

This frameless wall panel is perfect for a variety of applications, including new builds and renovation projects. There are two fixing kits to choose from: the 15mm Direct option and 65mm Stepped solution. They can both be used to create eye catching designs. This new, aesthetically attractive, and high performing acoustic solution promises to enhance room acoustics and is ideal for stylish design.

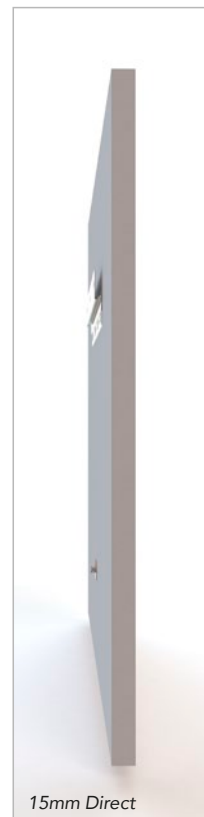

INDIVIDUAL EXPRESSION

The Rockfon Eclipse Wall panel is available in custom colours and a variety of geometric shapes.

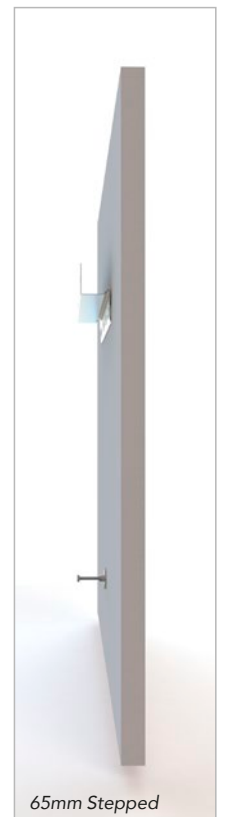

The two fixing kits make installing the wall panels quick and easy, and they can be mounted on different structures such as concrete, wood and steel.

FACTS

- Quick and easy installation
- Unrestricted potential and endless design possibilities.
- Can be used in a wide variety of application areas.

BRINGING YOU CLOSER TO THE INSTALLATION

Our new installation videos bring you closer to the installation of our Rockfon Systems than ever before.

3D enhanced installation and depth

To clearly capture every detail and nuance of installing our ceiling systems, we have decided to release our installation videos in 3D. A great addition to our system descriptions, you can now see the installation of our suspension systems and tiles in a way you have never seen before. The videos bring a superior range of visual movement and offer a high level of visual guidance.

New releases

We have recently released four new 3D installation videos :

- See how quick and easy it is to install Rockfon® System Eclipse Island™, our popular range of frameless acoustic islands.

- To support the launch of Rockfon® System Eclipse Wall™, this video demonstrates the creative potential of our frameless acoustic wall panel and the benefits of its two fixing kits.

- Rockfon® System T24 X™ single layer and Rockfon® System T24 X™ double layer acoustic ceiling systems. These two 3D videos perfectly showcase every installation step of our high end, concealed acoustic solution which creates an elegant continuous ceiling expression.

Coming soon

We are continuously updating our installation video collection, so be sure to follow us on our Rockfon UK YouTube channel. In 2018, we have planned the release of more Rockfon System installation videos, so stay tuned.

A great additional tool to our system descriptions.

A high-level of visual guidance.

Capture superior installation movement and spatial relations.
